

HOSPICE CAN HELP AND SO CAN YOU!

Patients and their families are often misinformed about hospice care and its benefits.

Early understanding of hospice allows for:

- Better symptom management
- More time for planning and support
- Care aligned with patient values
- Greater patient and family satisfaction

Clear and accessible hospice education informs patients and their families about:

- What hospice is, and what it is not
- When hospice may be appropriate
- What questions to ask
- How to approach care decisions

Better understanding leads to better care.

You can help by sharing resources with patients and their families, reinforcing hospice concepts during conversations, and referring families to trusted hospice resources.
